Prehabilitation Concepts

Kris Potts , RDH, BS, FAADH

Kris is a passionate and talented dental professional who brings a wonderful and rare balance of intellect, and humor to what she does. She has a wonderful ability to build relationships, put people at ease, and share her extensive knowledge.

Todd Cohen, CSP, Global Keynote Speaker

I had the opportunity to sit in a course by Kris Potts today that literally blew my mind. [Hygienist In Heels Josalyn Sewell](#)

What others are saying....I really enjoyed this course...informative and interesting.Superb!

Oral Care for the Oncology Patient: Prehabilitation Concepts (3 CEU)

This course covers the oral health concerns of cancer patients, suggestions to improve their treatment , and other aspects of oral health care you may not have previously considered.

Risk Assessments and Caries Management (3 CEU)

Using risk assessments is an evidence-based approach to recognizing an individual's risk for dental caries. Taking the appropriate steps to reduce this risk at the earliest indications and symptoms of disease rather than waiting for irreversible damage to the teeth to take place is preferred.

As the owner and CEO of Oral Health Promotion Strategies, Kris is an international speaker, author and coach. She is a leading promoter of "Prehabilitation", the anticipatory care for oral issues surrounding cancer *before* debilitating side effects of the disease or treatment develop. A member of the American Dental Hygienists' Association and a Fellow and accredited provider with the American Academy of Dental Hygiene. Kris uses her passion and decades of dental expertise to bring an informative and personal touch to the field. Her compassion comes from experience. Having lost several relatives and close friends to cancer and having walked through the unique challenges of a diagnosis herself, she understands what is needed to provide the best comprehensive care possible.

Sometimes Spit Doesn't Happen! (2 CEU)

This course reveals the special needs of people suffering from dry mouth , discussing the importance of creating a healthy oral environment prior to a patient undergoing medical treatments such as chemotherapy, kidney dialysis, or entering an assisted care facility.

Allow Kris to impact and inform your next event.
